

**Course Length:** 40 Hours

**Dates:** 19-21 May 17  
9-11 Jun 17

**Course Description:**

The combat lifesaver is a bridge between the self-aid/buddy-aid (first aid) training given all Soldiers during basic training and the medical training given to the combat medic. The combat lifesaver is a non-medical Soldier who provides lifesaving measures as a secondary mission as his primary (combat) mission allows. The combat lifesaver may also assist the combat medic in providing care and preparing casualties for evacuation when the combat lifesaver has no combat duties to perform. The combat lifesaver is trained to provide immediate care that can save a casualty's life, such as stopping severe bleeding and performing needle chest decompression for a casualty with tension pneumothorax.

**Course Requirements:**

- None

**Course POC:** SSG Daniel Brown, 217-761-1245,
